

Exodus: Instructions to download, install and configure

Download and Install:

1. In Internet Explorer go to <http://exodus.jabberstudio.org>
2. Under the Get Exodus section click Download Exodus
3. Click on the version named exodus 0.6.2.0.exe then click Download Now.
4. In the File Download window click Save and save the file to your Desktop or another location that you can easily get to later.
5. Click Save; when the download is complete click Close.
6. Double click on the file you downloaded. Exodus Setup will come up. Choose Groovy.
7. Follow prompts to install software.

Configure:

8. After installation Exodus will pop up a configuration window where you will have to enter your Gustavus username and password. (If you have not yet set up a jabber account or do not have a Gustavus username and password send your name and your reason for joining the Tierra Adentro chats to culpeper-dir@gac.edu)
9. Enter your Gustavus username and password in the corresponding fields. In the Configure Server field enter jabber.gac.edu
10. Click OK
11. To join a scheduled chat click the Join a Conference button from the toolbar or the Join a Conference option from the Exodus menu.

12. Enter the Room Name as specified in the Tierra Adentro schedule. In the next field enter conference.jabber.gac.edu. Enter your first name in the Nickname field. Click OK.
