

TVJab: Instructions to download and configure

Download and Install:

1. Go to the following address in Internet Explorer:
<http://www.terravirtual.net/tvjab/>

OS 9

2. Under “Get the latest version” Download the Stuffit Archive.
3. Double click the file to unstuff it.
4. Open the TVJab folder and copy the TVJab icon to your Applications (Mac OS 9) folder.

OS X

2. Under “Get the latest version” Download the OS X disk image.
3. Double click the image to mount it.
4. Double click the mounted image to view contents.
5. Drag the TVJab icon from the disk image to your Applications folder.

Configure:

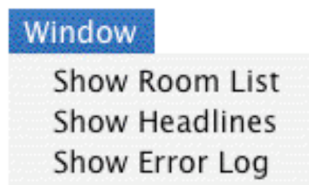

1. When you first open TVJab you will see a *New connection* window.
2. To log onto the Gustavus jabber server click the gray disclose arrow under the lightbulb.

3. Enter jabber.gac.edu in the Server field.
4. Enter your Gustavus username and password in the fields provided.
5. If you have not yet created an account click the *Create a new account* option and provide the information requested.
6. Click connect.

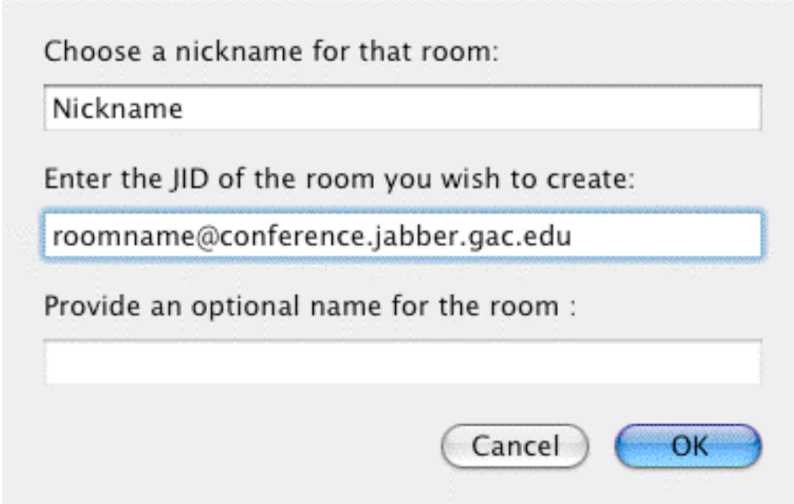

To join an existing chatroom:

1. From the Window menu select Show Rooms List

2. In the Chat Rooms window click the *New Room* button.

3. In the Nickname field enter your first name.
4. In the JID field enter the room name with no spaces or special characters followed by @conference.jabber.gac.edu
5. Click OK

Choose a nickname for that room:

Nickname

Enter the JID of the room you wish to create:

roomname@conference.jabber.gac.edu

Provide an optional name for the room :

Cancel OK
